Fremont, CA 94536

## TB-PPD Test

Your child will need to have a test to determine if he/she has been exposed to Tuberculosis. 48 to 72 hours after the test has been taken, you will need to return to your Pediatrician at which time the results will be read. The test becomes invalid and will need to be repeated if you fail to return within that 48 to 72 hours. Please have your Pediatrician fill out this form, and then return it promptly to ACH.
